

Discover your home at Compart and conquer the digital future of customer communication with us as

Senior Web Developer*

Full time. Permanent. Now.

As an international IT company with 170 employees in Böblingen (Stuttgart area), we have been developing smart software solutions and bringing people, companies and systems together for over 25 years. Our goal is to optimize the added value of customer communication through modern platforms that process, distribute and make accessible documents and content of any type and format in any system and channel. We are a leading provider in the field of omnichannel communication management and inspire our customers with our innovative world-class technologies

What to expect:

- Independent participation in an agile team in the new and further development of sophisticated medium-sized and large scaled products
- Development of a web-based application for the graphical editing of document templates based on the open standards XHTML, CSS, XPATH and XSLT
- Dealing with native web technologies and established standards with plenty of room for creativity and own solutions
- Active participation in the agile development process - both in collaboration with our designers and product owners, as well as in the team during implementation and (unit) testing
- Mutual code reviews and pair programming, continuous integration and refactoring
- Providing information to our technical writers for the creation of product documentation
- Participation in design and architecture (within the framework set by the system architecture)
- Minimum of 2-3 days/week in the office in Böblingen

Your profile:

- Successful study of informatics or comparable qualifications
- Very good fundamentals - as a senior at least 3 years' experience - in conception and implementation of user-friendly applications based on open standards and modern web technologies (Typescript and HTML 5)
- Good knowledge in the application of REST and XML technologies (e.g. XSD, XSLT, XPath)
- Experience in GIT, web security and optimally in cloud technologies (Docker, Kubernetes, OpenShift)
- High willingness to learn, technological curiosity and the ability to analyze complex technical contexts
- Ability to work in a team, positive attitude and solution orientation
- Very good knowledge of English in word and script, German language skills desired

Our Benefits for You:

- | | | |
|--|--|--|
