## Compart Press Release

### Compart Steps up its Business in Spain

February 7, 2013

**[Madrid, February 7, 2013] – Last year Compart bolstered its presence in Spain and is heavily committing to the Latin American market. This year, Compart seeks to expand its role as a leader in multi channel document management solutions to new industries**

Compart, a leading provider of multi channel document management solutions, is consolidating its presence in the Spanish market. Compart's output management solutions have led the transition from conventional high-volume printing to multichannel, digital communication over the last five years and during 2012 the company has strengthened its customer base and partnerships in Spain.

“Compart's solutions now give our Spanish clients the response they need to their high-volume document management questions, and do so with trustworthy technology that ensures success”, remarks Tomás Carrasco, country manager at Compart for the Iberian Peninsula and Latin America. “Our independent platforms have a bright future as they make documents accessible in any format, any medium, anywhere.”

In Spain, the company has also collaborated closely with partners such as Logica (now part of CGI), Nexea (Grupo Correos), Gdoc and Metaposta to provide clients in the banking, insurance and telecommunications industries the technology and innovation necessary to adapt specific document formats to any output channel, thereby increasing efficiency and optimizing process investments.

Last year, Compart has also expanded into the Latin American market, chiefly to Argentina, Brazil, Chile and Mexico, where the company is already implementing its solutions to help output printing management (OPM) business units adapt to the challenges of today's market.

## Background information on Compart

Compart is a leading global provider of multi channel document management solutions. Headquartered in Germany, with subsidiaries throughout Europe and America and served by a partner network in Latin America, Compart frees up your IT staff to focus on running your core business - not on the complexity of document management.

The most effective solutions in the field of multi channel document management are characterized by the scalable and platform-independent DocBridge® software - designed, built and supported by Compart. It enables your customers to access their documents in their format of choice conveniently - by post, mobile phone, online - irrespective of the original form, format or final delivery medium.

The DocBridge® software functionality spans, but is not limited to optimization, conversion and modification of document formats with quality assurance for compliance. With unparalleled industry experience for over two decades, Compart has consistently helped businesses improve operational efficiency with fast and flexible processing of high-volume data and document flow - delivering bespoke output internally or externally, on paper or digitally, anytime and anywhere they are required. Coupled with accurate, compliant, high quality and timely customer communications these two factors enhance customer loyalty and engagement.

Compart's technology, support and project management teams serve more than one thousand clients in over 42 countries across the banking, insurance, retail, print services, telecommunications, utilities and healthcare industries. Compart is also chosen as an exclusive technology provider by leading vendors in the industry. The company is recognized as an industry leader in driving innovation and delivering world class solutions. [www.compart.com](http://www.compart.com)
